SCIENCE INFORMATION

Block Science is no longer offered as a combined course. If students are looking to take two science courses in their freshman year, they will take Physical Science and Biology concurrently as two separate courses. Please keep in mind that if a student is planning on doing this, it is recommended that they are currently in Algebra 1 (or higher) and will be moving to Geometry (or higher) in their freshman year.

HONORS LANGUAGE ARTS 9 INFORMATION

Higher level thinking, reading, and writing skills are needed for this class. There is an application required in order to take this class. The middle school will communicate information regarding the application. Students will have required reading over the summer and may be asked to complete some assignments based on that reading over the summer as well. For student who need to improve their writing skills, it is recommended that they take Language Arts 9 and may enter into the honors and/or AP curriculum in a different year.

BIG HISTORY

Big History is a year-long course about the significant questions and changes in the history of the world -- from the Big Bang theory (as taught in 8th grade Earth Science) to events in modern times. From the subatomic to the universal, from the local to the global, Big History teaches students to consider their world from many different perspectives and to look for patterns to make sense of how change occurred. This course is interdisciplinary and appeals to those who have an interest in science as well.

TEACHER RECOMMENDATIONS

Toward the end of the school year, current middle school teachers will be providing additional input on course selections for students. Please be advised that these teachers have the best educational interests in mind when recommending students for specific courses. The middle school teachers will be notifying parents if they are suggesting changes in recommendations for students.
